

SUBLOCADE[®] RESOURCE BRIEF

Providing SUBLOCADE[®]

SUBLOCADE[®] is available only through a restricted distribution program called the SUBLOCADE[®] REMS Program. Prescribers can obtain SUBLOCADE[®] for their patients in one of two ways:

Providers can order SUBLOCADE[®] directly through a distributor:

To order SUBLOCADE[®] directly through an authorized distributor, providers must practice in a healthcare setting that is REMS certified. See the REMS certification section below for details on how to obtain REMS certification.

Providers can order SUBLOCADE[®] through a certified pharmacy for a specific patient:

- In advance of the patient's appointment, providers must send a prescription for a named patient to a certified pharmacy.
- The certified pharmacy will send SUBLOCADE[®] to either the prescribing practitioner or the practitioner administering the controlled substance, as applicable, to administer directly to that patient.
- This method of provision DOES NOT require your healthcare setting to be certified in the SUBLOCADE[®] REMS Program. [A list of certified pharmacies can be found here.](#)

BECOMING REMS CERTIFIED:

In order to become REMS certified, providers must do the following:

- Designate an authorized representative.
- The authorized representative will ensure that each dispensing location meets the REMS requirements and is eligible to purchase, receive, and dispense SUBLOCADE[®].
- Complete, sign, and submit the [SUBLOCADE[®] REMS Program Healthcare Setting and Pharmacy Enrollment Form.](#)
- Implement the REMS program.
- Establish processes and procedures to verify that SUBLOCADE[®] is dispensed directly to a healthcare provider for administration to a patient.
- Implement the necessary staff training and processes to comply with these processes and procedures.

SUBLOCADE[®] RESOURCE BRIEF
